

Tube amplifier output transformer LL1691E 20k : 4, 16 ohms (for 211 and similar tubes)

The LL1691E is a dual-coil single-C-core tube amplifier output transformer for 20k : 4, 16 ohms impedance ratio available in PP and SE versions.

The coil is wound using our high internal isolation technique with isolation foil between each copper layer. The core is an audio C-core of our own production.
